

The typology is based on the examination of 10 different aspects of the official free mark design and classifies marks into **categories, groups, types, and varieties**. The basis of differentiation is illustrated in the diagram (Figure 1). The process of classification is sequential with differences in the initial characteristics creating broad classes of marks that are further refined as one moves down through the process.

Figure 2 on the following page provides a listing of the types of known Botswana official free marks using the process described above. It only goes to type level, since almost every official free mark is its own variety. Given this complication, it will remain important that the user of the typology looks at visual

examples to determine if they have an exact match or not. A verbal or shorthand description of a mark can be given using the coding with the information on variety given in long-hand.

The prime characteristic used to determine the category of an official free mark is whether the mark is comprised only of the word “Official Free” which is defined as a straight-line mark or if it has additional text, which is defined as a multi-line mark. Given the fundamental differences in the look and information contained in these different categories of the marks, the process of further differentiation uses different characteristics to further define the marks. The process of further classification using these different characteristics is illustrated in Figure 1.

For multi-line marks, the dimensions are measured from the outside edges of the mark. On oval marks, the outer dimension of the widest parts of the mark are measured. For circular marks, measurements are taken of the outer diameter of the mark. For straight-line marks without lines or borders, the horizontal measurement is taken from the left centre of the 'O' to the end of the middle stroke of the 'E' and the vertical dimension is usually the height of the first letter 'I'. On boxed markings, the outside dimensions of the box are used. On markings with the line above and below the length of the line is used for width and the outer dimensions between the lines is used for height. Dimension are listed width first and height second.

**Figure 1: Process of Differentiation**

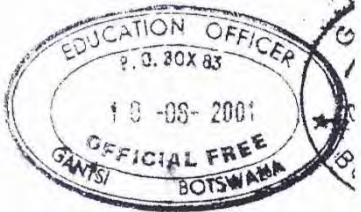

Category	Group	Type			Code
		Outer Borders	Interior Lines	Stars	
Multi-Line	Rectangle	None	0	No	RNON
		Single	0	No	RSON
				Yes	RSOY
			1	No	RS1N
			1 partial	No	RS1pN
			2	No	RS2N
			2 both doubled	No	RS2bdN
			2 both doubled, 1 extra border at bottom	No	RS2bd1eN
	3	No	RS3N		
	Rectangle, 2 Curved Corners	Single	0	No	R2ccSON
	Rectangle, 4 Curved Corners	Single	0	No	R4ccSON
			2	No	R4ccS2N
	Oval	Single	0	No	OS0N
				Yes	OS0Y
			1	No	OS1N
				Yes	OS1Y
		Double, both equal	0	No	ODbe0N
				Yes	ODbe0Y
			1	No	ODbe1N
				Yes	ODbe1Y
		Double, outer thicker	0	No	ODot0N
				Yes	ODot0Y
				1 on right	ODot01r
				1 on left	ODot01l
			1	No	ODot1N
				Yes	ODot1Y
				Crosses	ODot1C
1 on right				ODot11r	
1 + 2 partial horizontal			No	ODot12N	
Triple	0		No	OT0N	
Circle	Single	0	No	CSON	
		1	No	CS1N	
	Double, both equal	1	No	CDbe1N	
			Yes	CDbe1Y	
	Double, outer thicker	0	Yes	CDot0Y	
		0	No	CDot0N	
		1	Yes	CDot1Y	
	With Wings	1	No	CW1N	
Straight Line	No Border	Dimensions ("#" in code)			N#x#
	Line Over & Under	Dimensions ("#" in code)			L#x#
	Boxed	Dimensions ("#" in code)			B#x#
	Oval Border	Dimensions ("#" in code)			SO#x#

Figure 2: Typology of Known Official Free Marks of Botswana

Figure 3 provides examples of the various Botswana Official Free Marks to the type level. The wide variety of marks is shown on the remainder of frame 1 and on frames 2 through 5.
