

REGISTRATION LABELS TYPOLOGY - ADDENDUM NO. 1

by John Inglefield-Watson

The tentative typology published in 'Runner Post' No.15 (pages 270-275) included an appeal for additional information from members. Hopefully the small response indicates that it provides a fairly comprehensive and accurate coverage of the types of registration label that exist and that it is now reasonable to regard it as a definitive typology.

Only three new type elements have come to light - another different 'R' of recent vintage, a new form of the Office name and a variant of one of the original types of 'No.'. These and two new combinations of original type elements result in seven new overall Types, as described below. There are also numerous additions to the original lists of 'Recorded Offices of Use' and I would expect further discoveries.

My thanks are due to those members who contributed to the original article or to this addendum, especially Mike George, Roy Setterfield, Aubrey Glassborow and David Wall. Please continue to report new items to me.

Typology - Additions. Sub-paragraph lettering as in original article.

a. The 'R'

Type F - Squatter (9mm tall) and thicker (2.75mm) than Type E. Thick, square-ended serifs. Flat-footed.

b. The Office Name

Type 6 - Two line Office name. Top line 2mm, bottom line 1.75mm sans serif letters.

c. The 'No.'

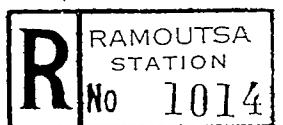

Type F - As Type D but the 'o' of 'No' underlined. The position of the underlining varies, sometimes being close to the bottom frame line - see the two illustrations of Type No. RL D5F5.

Recorded Label Types - Additions

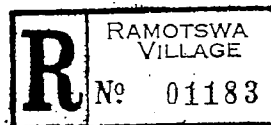

<u>Type No.</u>	<u>External Dimensions of blue frame (mm)</u>	<u>Recorded Offices of Use</u>	<u>Settings</u>	<u>Recorded Overall Period of Use</u>

B. B. S. AUCTION 5 (SOUTH AFRICA) RESULTS

A reasonably successful auction even though less than half of the lots on offer were sold with a relatively small turnover. The more unusual material continues to have the greatest appeal and I hope that the successful bidders are pleased with their purchases.

Howard Cook
